## BEAUTY NEWS

### DAYTIME DEFENCE

A **TINTED** moisturiser with an **SPF 30** and a colour that suits all skin tones — hard to believe, isn't it? But Dr Denese has come up with the perfect solution if you want to catch a few rays without burning, while at the same time showing off a healthy glow.

Defense Day Cream is a unique, intensely hydrating product containing zinc oxide, one of the most effective UV protection ingredients available. It's not often used, because it can be difficult to rub in. But the Denese formula uses micro-

nised zinc oxide, in a form that makes it more easily absorbed, leaving a perfect, oil-free, matt finish. The moisturiser also contains melanin, a natural tanning pigment that enables the cream to blend with any skin colour.

A rich combination of vitamins and minerals, anti-oxidants and ceramides provide additional anti-ageing and moisturising benefits. Defense Day costs £31.95 for 60ml and is available from Dr Denese on 0870 1900 003 or [www.drdenese.co.uk](http://www.drdenese.co.uk)
