Here are a few products to pack for your sunshine holiday...

◆ DEFENSE Day Cream SPF30 from Dr Denese (£31.95 for 60ml) is a moisturising day cream with built-in UVA and UVB protection. The high protection factor of 30 is quite unusual for a facial moisturiser. Even more unusual is the fact that it contains zinc oxide, a highly effective sun-

protecting ingredient not often used in day creams or make-up because it doesn't rub in very easily. This formula contains form of zinc oxide which does

rub in and is tinted to match any skin type, with the added bonus of a matt finish rather than leaving you with a face that looks like it's been hovering over the chip pan. This intensely hydrating cream also contains vitamins and minerals, anti-oxidants and ceramides to give additional anti-ageing and moisturising benefits. Log on to www.drdenese.co.uk or call 0870 1900003.
