Gotta Have It

IF your hands are chapped and dry thanks to winter weather check out **Dr Denese's Hand & Décolleté Serum**.

It's new on the beauty scene but has attracted rave reviews from the glossies, containing lemon bioflavonoids as well as retinol designed to hydrate the skin as well as delivering anti-ageing benefits.

It can also be used for the upper chest and lower neck as well as the hands. Dear at **£29.95** but the results are good.
