Tried & Tested Lip Plumpers

Tested

Pure Pout Lip Plumper

The Hype...

"Plump lips without injections, a truly smouldering and sensual pout"

The Truth...

Lips are prepared using the gentle exfoliator before the lip plumper is applied. The exfoliating step left lips noticeably smoother and the lip plumper did enhance the volume of the lips. Persevere with this one, the tingling sensation of the lip plumper does take some getting used to but it's definitely worth it because it works.

Costs £22.99

Transformulas LipVolume

The Hype...

"Volume will increase and contour, fine lines and smoothness will improve"

The Truth...

This was not as aggressive as the others and very little stinging was experienced. However, there wasn't a huge increase in lip size but it is meant to be used at least three times a day for one month. What can be said is the outline of the lips looked better, while their smoothness and moisture also improved.

Costs £22.99

Dr Denese MegaLips

The Hype...

"Long-term increase in the appearance of lip volume, 100 % Natural"

The Truth...

This was very good, although more so as an extremely intensive lip moisturiser than a plumper. The lip volume increased slightly but it was the overall appearance and feel of the lips that was impressive. This is better if you're looking to make the absolute best of your lips than trying to change their size.

Costs £17.95

DuWop Lip Venom

The Hype...

"Increases circulation, prompting a collagen-free bee-stung pout"

The Truth...

Loved by the celebrities, this has a lot to live up to! The gloss is gooey and smells spicy and minty. It feels luxurious when you slick it on and the slight stinging sensation makes you feel like it's working. Although you're never going to have huge lips from applying it, this is as close to perfection as it gets.

Costs £12.95
